Clean-Up

BEHR PREMIUM™ Chalk Decorative Aerosol is an easy way to create a unique and trendy look for your next paint project. This simple two-step paint and wax process allows your personal style and vision to come to life, whether you're looking for an aged antique look or prefer more of a vintage modern flair. The wide variety of BEHR paint colours and BEHR PREMIUM™ Decorative Waxes make every application completely tailored to achieve the one-of-a-kind look you desire. BEHR PREMIUM™ Chalk Decorative Aerosol can be applied over most existing surfaces with very little surface preparation and delivers a smooth matte finish. Perfect for refreshing old and new wooden furniture, cast stone, concrete, and even metal surfaces to create one-of-a-kind accent pieces.

\*A primer coat may be needed on some surfaces.

### PREPARATION

The surface must be clean, free of dust, grease, wax, peeling paint, mold or mildew. If washing is necessary, use a non-soapy detergent or a TSP substitute. Rinse well and allow to dry.

**\*Peeling or Checked Paint:** Scrape off loose paint and sand to a smooth surface. Sanding or removal of paint containing lead is hazardous.

**\*Glossy Surfaces:** For maximum adhesion, scuff sand the surface thoroughly before painting.

### APPLICATION

Eye protection is recommended. For best results, use at room temperature. Cover adjacent areas to protect from overspray.

Shake can vigorously for one minute after mixing ball begins to rattle and often during use. Hold can upright, moving from side-to-side while spraying lightly and evenly about 30 cm (12") from area being painted. Two to three thin coats produce best results.

### CLEAN-UP & DISPOSAL

Clear spray valve immediately after use by turning can upside down and spraying until only clear gas is released. If spray nozzle becomes clogged, remove and clean. Do not stick pins or wire into can opening. Clean fresh overspray with mineral spirits or paint thinner. Remove dried paint with paint remover, but test small area first to ensure paint remover does not damage substrate. Please consider donating any unused product. For recycling or disposal information contact your local household refuse collection service.
